“ Modern project managers are now seen as strategic partners, integral to the ideation phase as well as execution. They are expected to understand market dynamics, emerging technologies, and even the intricacies of disruptive innovation. The role has evolved into that of a facilitator for change, responsible for selecting, testing, and implementing innovative ideas and solutions within the project context. ”

The practical way

What you can do about it?

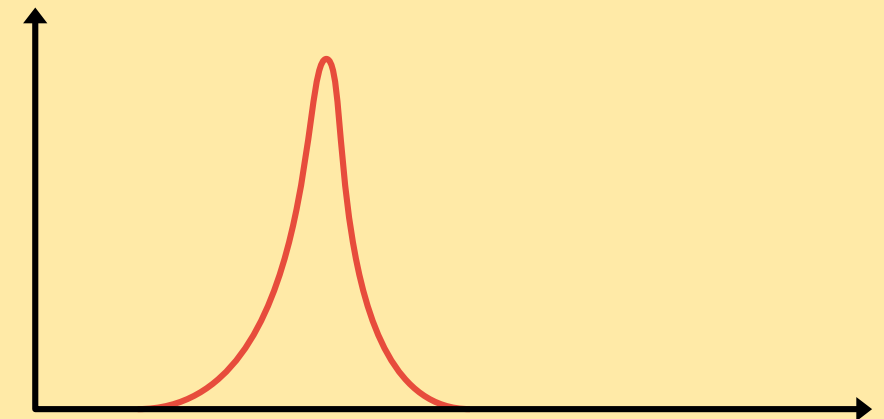

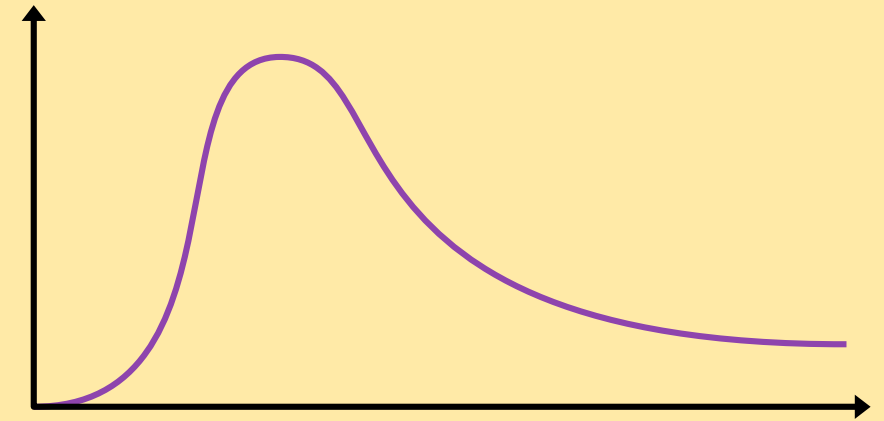

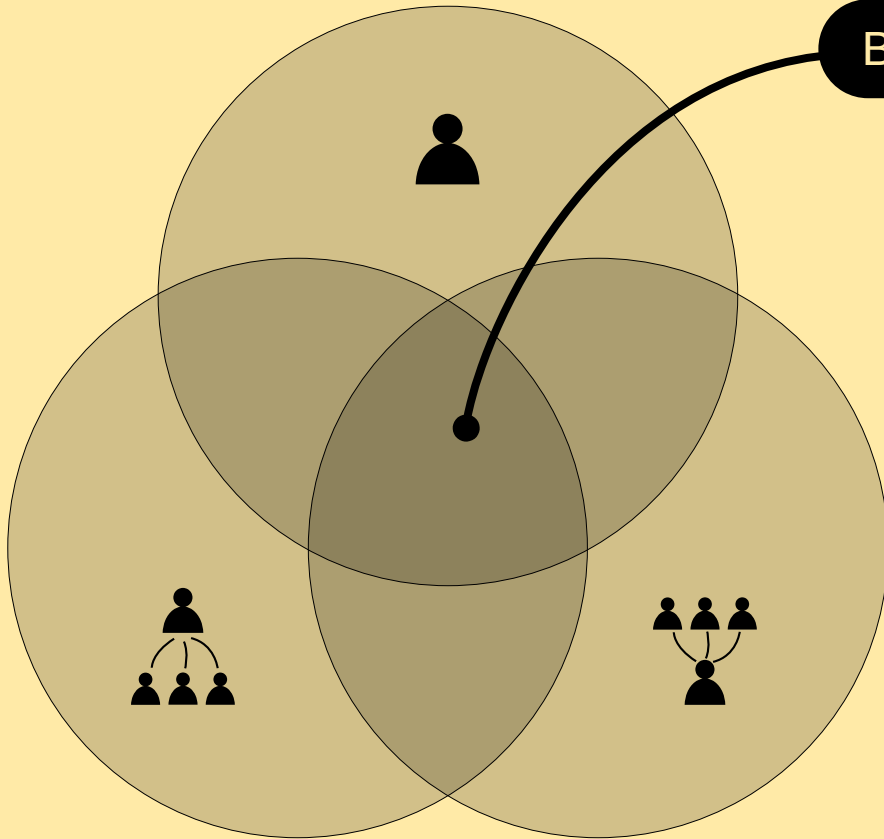

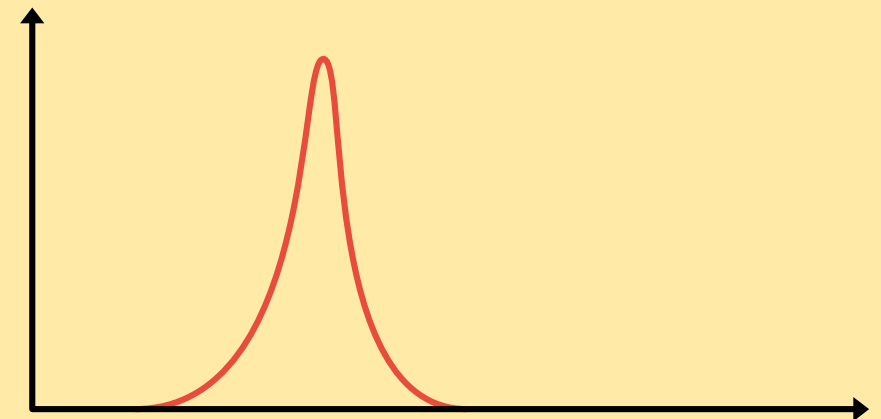

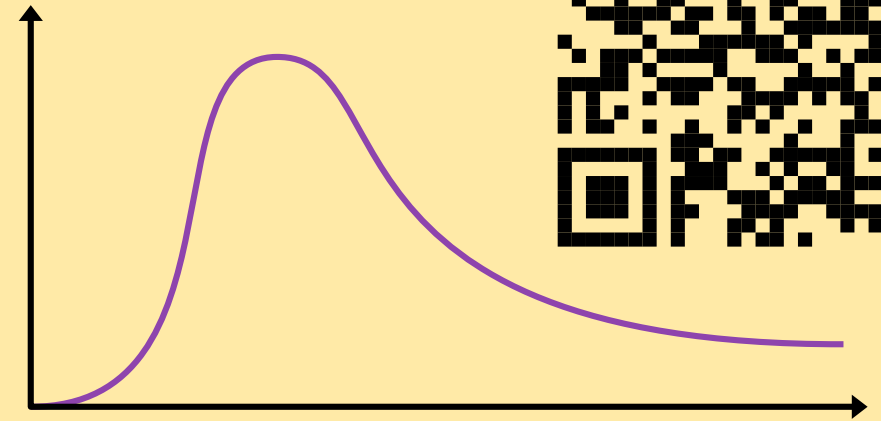

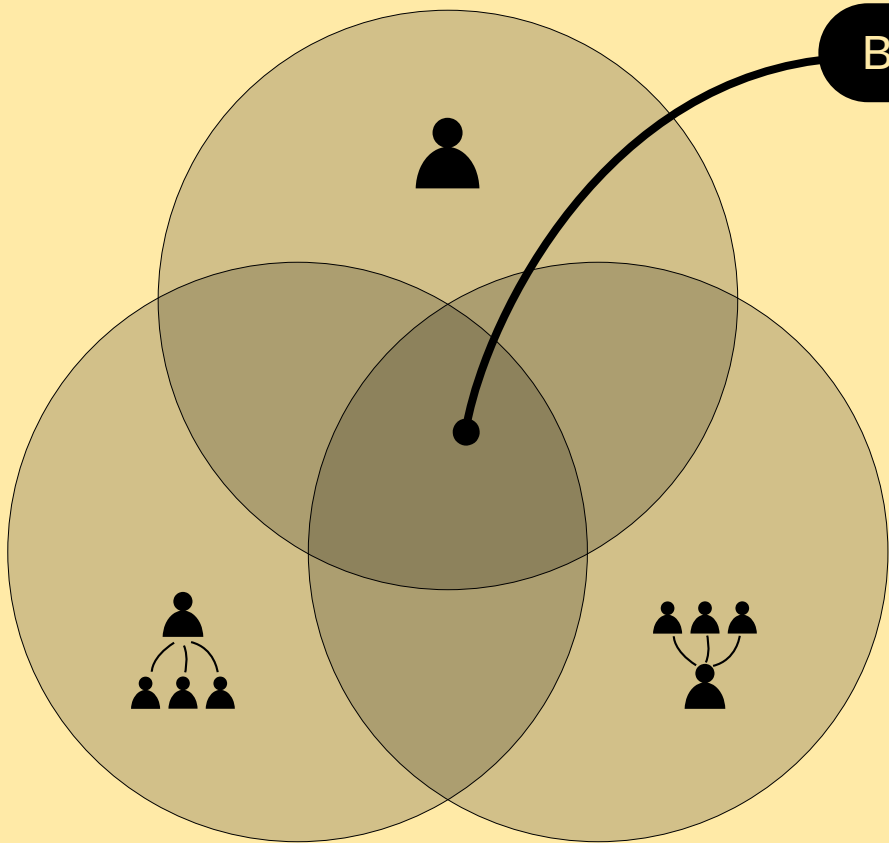

Be careful with hypes

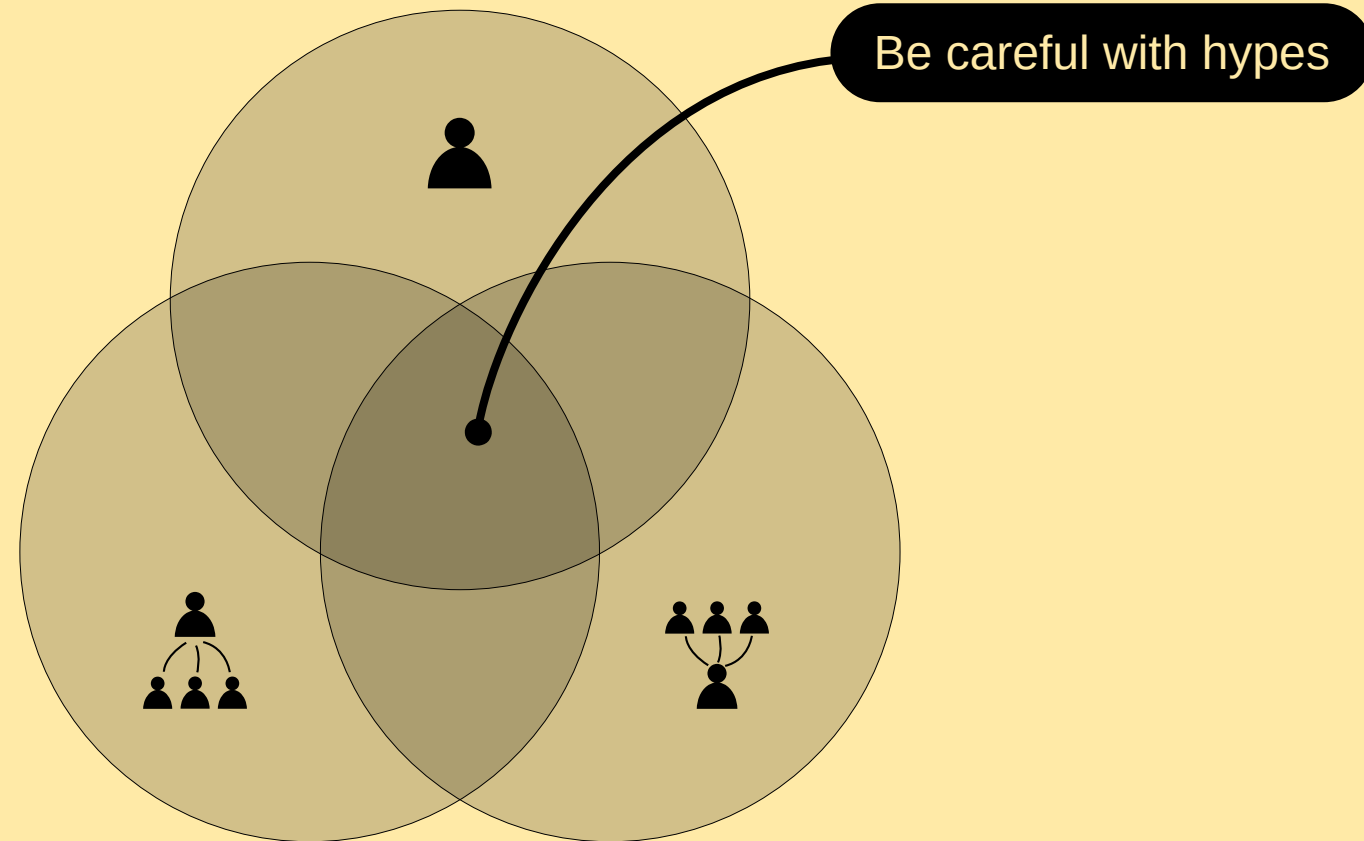

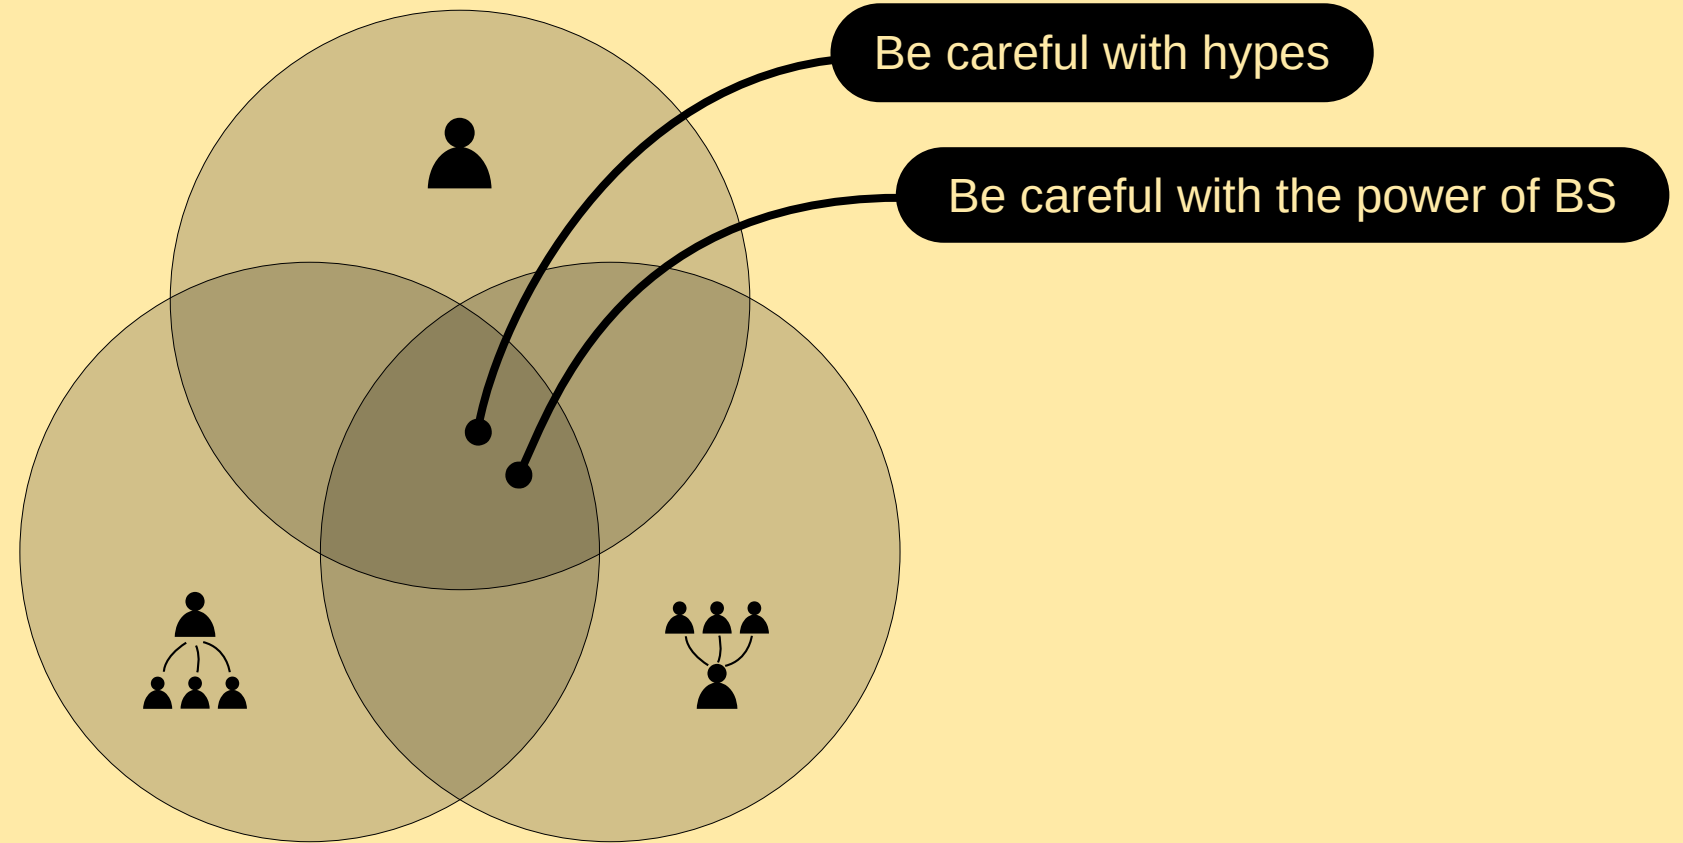

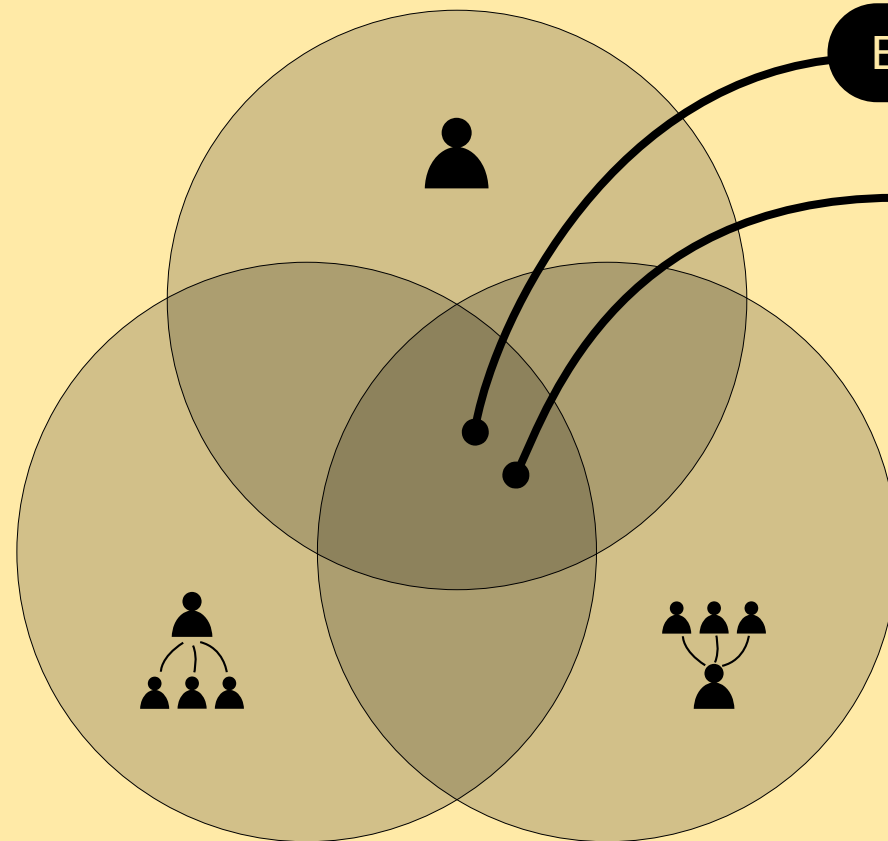

Be careful with hypes

Be careful with hypes

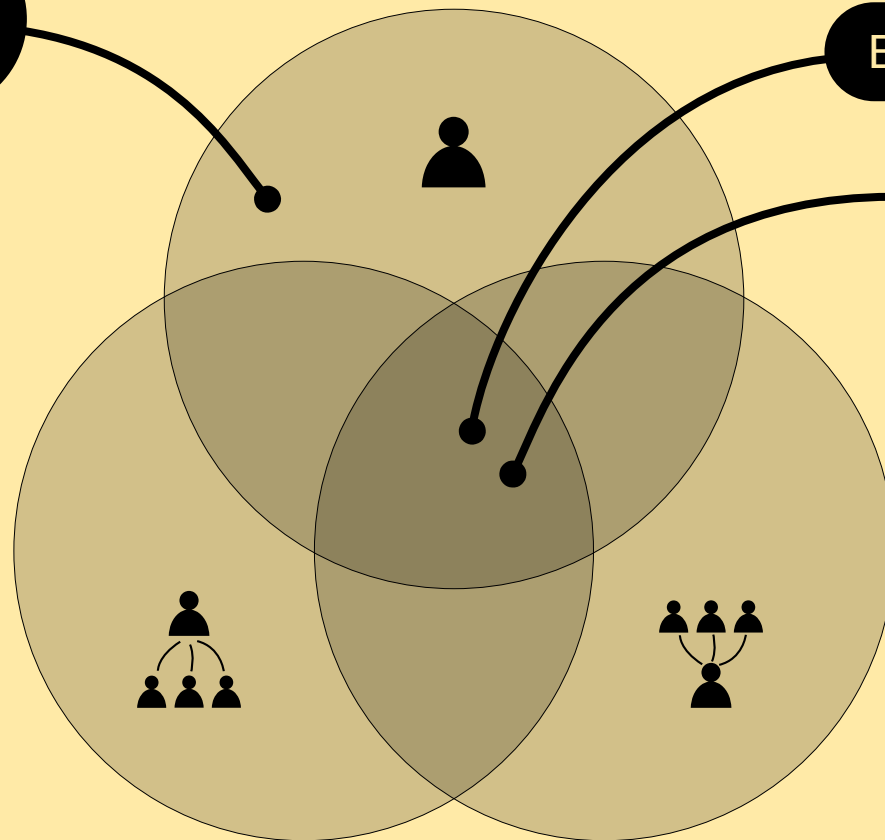

Be careful with the power of BS

Don't think you can do everything on your own

Be careful with hypes

Be careful with the power of BS

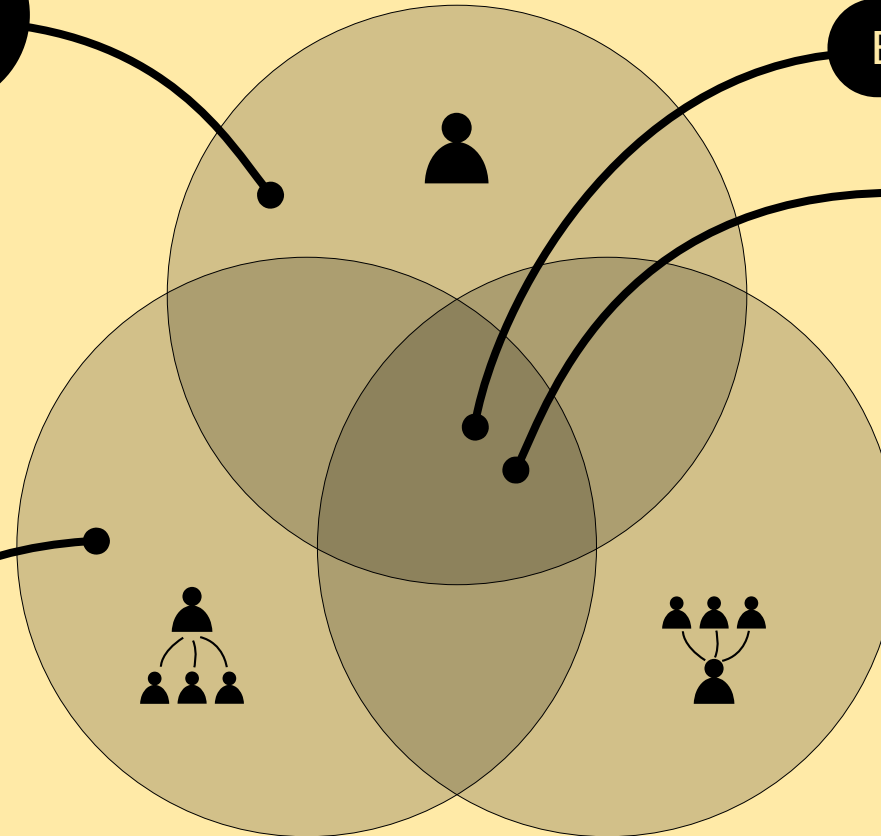

Don't think you can do everything on your own

Be careful with hypes

Be careful with the power of BS

Remember your social and ethical responsibility

Don't think you can do everything on your own

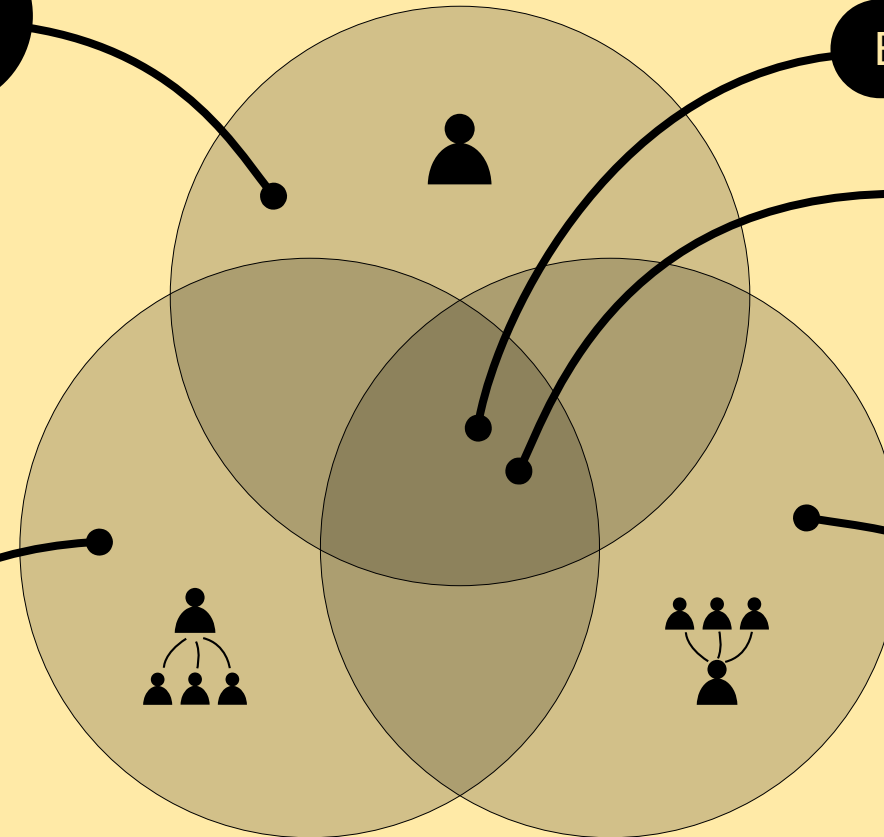

Be careful with hype

Be careful with the power of BS

Improve your convincing and negotiations skills

Remember your social and ethical responsibility
