The potential X/Y war!

2027-01-20, Concern:

Country X may attack Country Y, which may increase oil prices,
which in turn increases the cost of all material we have to buy for the project.

Custodian: Didi

The potential X/Y war!

Custodian: Didi

2027-01-20, **Concern:**

Country X may attach Country Y, which may increase oil prices, which in turn increases the cost of all material we have to buy for the project.

2027-01-20, **Action:**

Let's take about two weeks and study the situation in detail.

2027-02-04, **Comment:**

There's an 80% chance that it will happen, and if so, our best estimate is 12% increase in the total project cost.

2027-02-04, **Action:**

Let's see if the customer would help us with it.

2027-02-06, **Comment:**

They don't!

2027-02-08, **Action:**

Let's get a loan as soon as possible and buy all the material now, before prices increase. That would limit our loss to maximum 4%.

The potential X/Y war!

Custodian: Didi
